

RED, BIG RED

The most accurate box beam level comes from SOLA!

Know-how, accumulated over decades, constant striving for improvement and the use of modern production technologies enables SOLA to produce the most accurate box beam level in the world.

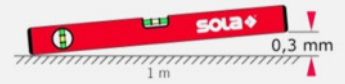

For professionals who rely on accurate readings in the harshest site conditions, SOLA NEW supplies **with beginning of October 2013**, the top model RED and BIG RED with an improved accuracy of **0.3mm/m** in normal and **0.5 mm/m** in reversed position.

To achieve this accuracy SOLA decided to **remove the milled measuring surface**. By this measure, the wear-resistant coating remains intact which improves the surface protection and makes the cleaning of the spirit level much easier.

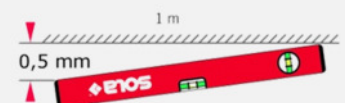

Programme RED, BIG RED from October 2013:

Model	Length in cm	Item No.
RED 3	60	01214801
RED 3	80	01215101
RED 3	100	01215301
BIG RED 3	120	01219401
BIG RED 3	150	01219501
BIG RED 3	180	01219601
BIG RED 3	200	01219701
BIG RED 3	240	01219901
Packaging type:	loose	
Packaging unit:	1 piece	

Persuasive advantages

Measuring tolerance (standard measurement): **0.3 mm/m** (0.017°)

Measuring tolerance (inverted measuring): **0.5 mm/m** (0.029°)

Faster, better and more precise measuring with FOCUS vials, made by SOLA

Technical details

- Aluminium box profile, red epoxy coated
- Profile weight approx. 890g/m
- Dimensions approx. 59 x 26 mm
- 1 horizontal vial
- 2 plumb vials
- 2 handholds (BIG RED)

Product advantages

- Precise, unbreakable acrylic block vials
- Horizontal FOCUS vial with magnifying lens and luminous backing
- Handholds and chamfer for secure grip
- Shock-absorbing end caps
